**MORE THAN A CAR**

# Sion features

**SOLAR INTEGRATION** 456 half cells seamlessly integrated into the body of the car can add 112 km, on average (up to 245 km) per week, of driving range, via the power of the sun. Full self-sufficiency on short distances.

**BIDIRECTIONAL CHARGING** The Sion is not just able to draw and store energy, but share it as well. Via a regular household plug, the Sion can power all common electronic devices with up to 3.7 kW. It can deliver even more power when using a Type 2 plug.

**RANGE AND BATTERY** The lithium iron phosphate (LFP) battery has a capacity of 54 kWh and is equipped with a liquid cooling system. The battery capacity is sufficient for a range of up to 305 km in accordance with the WLTP standard.

**MOTOR** 120 kW (163 h.p.), top speed of up to 140 km/h.

**SONO MOTORS APP** Mobility & energy services – share your Sion, electricity, or a ride via your smartphone.

**TOW BAR**

**ONE SIZE FITS ALL** Comfortable interior with 650l of trunk volume.

Section 3 of our company's foundation agreement states: "The company's highest standard shall be the protection of the environment, nature, and people. All of the company's products, actions, and investments must be based on this underlying principle." Our mission is to accelerate the revolution of mobility by making every vehicle solar. A world without fossil fuels – that is the vision of the three friends who founded Sono Motors in 2016.
